EDUCATION

Peking University | School of Mathematical Sciences | Sep. 2024 – Present

- Selected Coursework: Real Analysis (95), Data Structures & Algorithms (92), Biostatistics (99), Mathematical Statistics (96.5).

Beijing No. 4 High School | Chemistry Special Class | Sep. 2021 – Jun. 2024

RESEARCH & PROJECTS

Bayesian information borrowing in clinical trials | Course projects

- Designed a simulation study comparing independent, complete-pooling, and hierarchical Bayesian models under varying levels of subgroup heterogeneity.
- Implemented Bayesian simulation and posterior analysis in Python/PyMC; evaluated bias, MSE, interval coverage, and decision integrity.
- Investigated when information borrowing improves estimation and when excessive pooling can distort subgroup-level inference.

Nonparametric Bayesian volatility learning under microstructure noise | Quantitative Finance Course Project

- Reproduced a published Bayesian approach to financial volatility estimation and independently implemented the core estimation procedure.
- Analyzed modeling assumptions and empirical results, and delivered a course presentation on the methodology and interpretation of volatility dynamics.

EXPERIENCE

Sino Boson Technical Company | AI Application Engineer | Aug. 2026

- Independently built an AI-powered resume screening and job-matching system, replacing manual review with a structured automated workflow.
- Implemented OCR-based digitization and structured archiving, multi-dimensional candidate scoring, and JD–candidate matching.
- Performed human–model consistency checks and iterative model optimization; delivered a reusable solution for company-wide recruitment automation.

HONORS & AWARDS

- 1st Prize, 36th Beijing Collegiate Mathematics Competition — Mathematics Major, Group A.
- Gold Medal, 37th Chinese Chemistry Olympiad — National Final.
- 2024–2025 Peking University Practice & Public Service Award; Yuanning Scholarship (2 recipients school-wide).

LEADERSHIP & TEAM EXPERIENCE

Student Union, School of Mathematical Sciences | Team Lead, Arts Department | Mar. 2025 – Mar. 2026

- Redesigned team structure and responsibilities and established SOPs for event planning, task allocation, handoffs, and post-event review.
- Led campus events including a live-action RPG, freshman Gala, and New Year Gala, improving execution efficiency and cross-team coordination.
- Long-term choir participation and university women's football training; developed teamwork, discipline, and resilience through sustained team practice and competition.

TECHNICAL SKILLS & PROFILE

Programming: Python, R **Quantitative:** Mathematical Statistics, Bayesian Modeling, Statistical Simulation, Algorithms

Languages: Chinese (native), English (CET-6: 613)
